Happy New Year

AGS would like to take this opportunity to wish our customers and friends a HAPPY, HEALTHY and PROSPEROUS 2006!

The Komori Spica is out of this World

Found in the constellation Virgo, the star Spica (pronounced "spee-ka") is visually 2100 times more luminous than our own Sun. Likewise, Komori's own Spica is shining brightly in both large and small print shops around the country.

The Spica is a highly automated four-color, 29-inch convertible perfecting printing press and it is receiving rave reviews for its versatility, printability and affordability. Designed to compete in the ultra-short-run, 4-color printing market, the Spica offers numerous benefits over competing offset and digital presses in this segment.

1. Print quality - substantial inker & Komorimatic "Delta" dampening provide true "litho" quality
2. Ease of operation - PQC ink & register console utilizes CIP3 ink key data from pre-press making job set up quick and easy
3. Automatic plate changers - utilize metal or polyester plates
4. Format - at least double the format of most digital presses
5. Versatility - convertible perfecting capability makes the Spica ideal for 4-color, 2-over-2 and 1-over-1 printing applications
6. Less expensive to operate - none of the consumables and maintenance costs found in digital offerings
7. Longer technology curve - no RIP's etc. to become antiquated
8. Higher feeder & delivery pile and faster running speeds
9. Economies of scale - cost per copy decreases as number of copies increase
10. Broader range of stock types and thicknesses

We invite you to take a look at this versatile printing solution.

Recent Installations

Laurel, Maryland - **S&S Graphics** (photograph) has a new **Komori LS640**. This is the first Komori printing press for S&S.

Worth Higgins & Associates has recently installed a Komori **Spica**. The automated four color, 29-inch convertible perfecter is the 10th Komori for the Richmond, Virginia company.

Baltimore, Maryland's **PS Graphics** has installed a **Saber 95** paper cutter. The heavy-duty 37-inch knife provides unique productivity and design benefits over competitive offerings.

Limited Time: Pile Turner FREE Trial (EXTENDED)

If you're serious about improving the productivity and throughput in your pressroom then we're serious about helping.

Do comments like "If you want my pile turner, you'll have to pry it from my cold dead hands" resonate? They will if you take advantage of our FREE pile turner trial . . . but be careful, we don't want to have to do any prying!

Call us for more details at 1.410.290.8200.
