Print 05 is Here and Komori's Ready!

Komori will be exhibiting some impressive iron including two 10-color, 28 X 40-inch presses at Print 05, September 9-15th.

A ten-color LS1040P+C (pictured) will be featured in the booth. The

15,000 sheet per hour, 5-over-5 convertible perfecter with tower coater is sure to be a show stopper.

Also on display will be a L540SP. The massive ten-color press will feature an in-line roll-to-sheet feeder. This set-up is ideally suited for many SP40 applications.

In addition to the big iron, Komori will be demonstrating two half-size press solutions: a six-color, 20 X 28-inch new Lithrone L628P+C and the economical, versatile Spica automated four-color convertible perfecter.

While at Print, we encourage you to visit the Colter & Peterson booth (#823). This exhibit will feature the latest in cutting system and material handling solutions. Please take special note of the Baumann pile turner. In today's demanding production environments, NO print shop should be without an automated pile turner!

For your finishing solutions, stop by the Independent Machinery booth (#10037) to view *live* footage of the new Gietz Foil Commander foil stamper. Also see the new Sanwa TRP1060SE-II die-cutter running light stock at impressive speeds and view the Heiber & Schröder "Combo" window machine applying scored and traditional windowing on the same carton blank.

Coming Soon to a Printer Near You!

If you haven't yet seen the latest in Komori 40-inch technology, chances are you won't have to go very far.

Recently, several printing companies in the mid-Atlantic have taken delivery of new Komori's. **Beard Printing** and **York Graphic Services** (pictured) of York, PA are now proud owners of LS640 six color, 40-inch presses. Just around the corner in Gettysburg, **Herff Jones** is installing a L540SP 10-color machine.

Not to be out done, Maryland printers **S&S Graphics** and **Mount Royal Printing** have recently taken delivery of their LS640's.

In Virginia, **Worth Higgins & Associates** has added a six color, 40-inch LS to its stable of Komori presses and **Gurtner Printing** has installed a L640.

Thank you and congratulations to these dynamic printing companies!

Featured Pre-Owned Equipment

The featured pre-owned machinery listed in the left column contains links to pdf's with detailed descriptions and pictures. Simply click on the underlined product of interest. For a complete pre-owned equipment listing visit us on the web at www.agspress.com.
