

# ***SPECIALIZED PAPER HANDLING EQUIPMENT***

INTRODUCING

**C&P PERIPHERAL**  
BY KNORR SYSTEME

## LOADING

## JOGGING

## SORTING / BUFFERING

## UNLOADING

### SL-Lift the "small one"

500kg capacity. Automatic lifting up to working height. Also available with pilling device (modell SL/E) or the platform. Control panel can be mounted left or right side. Various format sizes available.

### Autom. Jogger Type "RL"

Exact alignment before cutting. Creates better piles for better cutting results. Improving cutting tolerances. Right and left jogging possible. Jogging intensity stepless adjustable. Various sizes available.

### Airpallet lift "LLK"

KNORR air board system is the perfect solution to separate the various work sequences and eliminates waiting time. Can be used offline at a jogging station as well at a cutting station.

### Unloader "ABS"

Automatic unloading is the most efficient way to make full use of high production capacity of a guillotine cutter. During the process of automatic unloading, the operator can proceed with cutting the next ream. Various sizes available.

### L-stacklift the "classic"

lifting capacity up to 2000 kg. Automatic lifting at working height. Also available with pilling device (modell L/E) or platform. Control panel left or right hand. Various format sizes available.

### Autom. Jogger type RLA

Exact alignment before cutting. Air removing roller creates better piles for more accurate cutting. Right and left side jogging possible. Intensity stepless adjustable. Various sizes available.

### Airpallet lift with automatic board removal "LLK-BA"

The LLK-BA takes off the free board from the board lift and puts it onto a trolley, saves time and gives more efficiency.

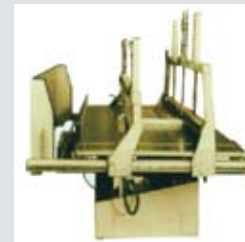

### Unloading Lift "AL"

Two adjustable gauges and freestanding for the operator, working without physical stress, easily stacking and packing.

### Stacklift "BFA"

lifting capacity up to 2000 kg. Automatic lifting at working height. Also available with pilling device (modell L/E) or platform. Control panel left or right hand. Various format sizes available.

### Autom. Jogger type "RLA-M"

Air removing function for full- as well as small size paper formats. Right and left jogging possible. Jogging intensity stepless adjustable. Exact alignment before cutting. Creates better piles for better cutting results. Various sizes available.

### Sorting Buffer "SP"

Available with 6 or 10 shelves prepared reams of different jobs can be stocked and sorted - every board can be selected separately.

### Automatic loader "BLS"

Semi-and fullautomatic loading of high speed cutters. Efficient and automatic working during cutting process. Various machine sizes available.

## PAPER MOVEMENT

### Air conveyor tables "LT"

The most commonly used devices to transport materials onto and off the cutter. All tables are manufactured with stainless steel surfaces.

### Grippersystem "GTS"

The KNORR gripper system automizes the workflow in the cutting process. Using a gripper system, combined with other components, waiting time and man-power can be reduced. Various sizes and length available.
